Using Dual Overhead Projectors
BAS S278 and BAS S341
This presentation will show you how to operate the master classrooms with dual overhead projectors.
Using Dual Overhead Projectors 
BAS S278 and BAS S341

First, you should adjust the classroom lighting according to your needs.

Light switches are normally found next to the classroom door.
Next, you should make sure the power is on in the equipment rack.

The power switch for the equipment rack is found in the upper right-hand side of the console.

Make sure the Dell teacher computer is turned on. The computer is found inside the teacher workstation. The power button is on the front of the computer.

The Dell teacher computer has dual (two) monitors.
The primary computer monitor is the SmartBoard that sits on top of the workstation. The primary monitor is referred to as “PC” or “PC Main”.

Using Dual Overhead Projectors
BAS S278 and BAS S341
The secondary computer monitor is the Dell monitor located inside the workstation.

The monitor is visible from behind the glass on the top of the workstation.

The secondary monitor is referred to as “PC 2ND”.

Using Dual Overhead Projectors
BAS S278 and BAS S341
The AMX touch panel controls what is displayed on each of the overhead projectors (left or right) and on the secondary monitor of the teacher computer.
Using Dual Overhead Projectors
BAS S278 and BAS S341

Touch the AMX screen to begin using the projection equipment
On the “What Would You Like To Do” screen touch the “Select Video or Computer” button to turn on the right overhead projector.
Once the “Select Video or Computer” button is pressed the right screen will lower and the right projector will turn on.
The “Choose Source” screen allows to select what to display on the right overhead projector. To show the main computer screen on the right projection screen touch the button marked “PC”.
To control the left projector press the “Left Proj Control” button.
Press the “Screen Down” button to lower the left screen.
Press “Proj On” to turn the left overhead projector on
Choose what to show on the left projection screen: “VCR”, “Doc Cam”, “PC Main”, “Laptop”, “DVD”, or “PC 2ND”
Using Dual Overhead Projectors
BAS S278 and BAS S341

Both screens down with the overhead projectors displaying your selected sources
To return to the main menu press the “Exit” button on the “Left Projector Control” menu.
The “Dell Monitor” button on the AMX controls what is shown on the second computer monitor.
The Dell Monitor screen allows you to choose what is shown on the screen of the Dell Monitor.

The default is the “PC 2ND” or secondary computer monitor.
Using Dual Overhead Projectors
BAS S278 and BAS S341

To show the Document Camera on the Dell Monitor, press the “Doc Cam” button. The document camera will automatically power on.
Look for the green light on the front left side of the Doc Cam to make sure the power is on.

If for some reason the power does not automatically turn on, you can manually turn it on by pressing the large green button on the front left side.

To return to the main screen at any time just press the “EXIT” button.
If you want to show a DVD or VCR tape press either the “DVD” or “VCR” button while in either the “Choose a Source” menu (right projector) or “Left Projector Control” menu.
Using Dual Overhead Projectors
BAS S278 and BAS S341

To play a DVD/CD simply insert the disc into the player and select “DVD” in either the “Choose Source” or “Left Projector Control” menu.
Using Dual Overhead Projectors
BAS S278 and BAS S341

Once you have pressed the “DVD” button, use the controls on the AMX touch panel to play your DVD/CD
To show a VCR tape, select “VCR” on the “Choose a Source” or “Left Projector Control” menu.

Then, use the “VHS Controls” to play the video.

Note: Make sure there is no DVD inserted.
To show a laptop on a overhead projector: a) connect the video cable from the back of the document camera to the external display connector of the laptop; b) select “Laptop” on the menu.
To end your presentation, touch the “Exit” button. The right projector and screen will turn off. The left projector and screen must be turned off manually using the “Left Projector Control” Menu.
