Creating a Power Point Presentation with Turning Point

Creating the PowerPoint

Contact the Business Computer Lab to Install Turning Point V5 on your faculty machine.

Click Start, Programs and Turning Point V5

The application will open and three separate tabs show up: Polling, Content, and Manage.

Select the Polling tab (this is the default)
Then click on “PowerPoint Polling”

This will open PowerPoint and the Turning Point tab will be present in your presentation.

Click on “New” to create a new question (slide).

Once a question type is selected you can edit the question just like a normal Power Point slide.

The Preferences are on the right side of each question and can be changed for each question (slide).

The Question Options, Polling Options, and Scoring Options can be changed on this preference window.

Under the Scoring Options you can select the correct and incorrect answers

Example of True / False Question

President Lincoln was born in 1809.
A. True
B. False

Example of Multiple Choice Question

When was President Lincoln Elected?
A. 1856
B. 1860
C. 1864
D. 1870
### Using the Power Point and Polling in Class

Once your presentation is finished you will need to check out a set of clickers from the Business Computer Lab.

**Insert** the receiver (USB stick) in the teacher computer.

**Open** Turning Point then Open your Power Point.

Make sure to tell all students to press "GO".

After the light has stopped blinking they are ready to begin polling.

Start the slide and the polling will open automatically.

The **first** mouse click will close the polling and graph will show the results of the polling.

The **second** mouse click will advance to the next slide and polling for the next question will automatically start.

### Viewing Results

Click on the Reports Icon

There will be a drop down menu on the left that allows options to export the data

There will be a drop down menu on the right that allows options as to how the results are viewed.
