

Credit when it's due!

Earn your associate degree while you work on your bachelor's degree.

Our academic records indicate you could now be eligible to receive your Associate's Degree through [Tennessee's Reverse Transfer Program](#). Through this program, your credits from your respective community college are combined with credits earned here at MTSU to determine if your coursework completes the degree.

Why should you participate in the Reverse Transfer program now that you are enrolled to earn a Bachelor's degree?

The Associate's Degree you started at your respective community college could be awarded to you at no cost while you continue working toward your Bachelor's Degree here! It's simple – you may have already earned this degree, so why not receive it?

To determine if you meet the requirements for an Associate Degree

To facilitate the recording of any degree awarded, we need your electronic consent to **1)** share your MTSU courses, grades, and transcript with the Registrar's Office of your respective community college for a preliminary evaluation of your combined credits, **2)** allow your former 2-year institution to send a copy of your transcript to us, if it is requested, and **3)** allow your former 2-year school to request a transcript from any other institution you may have attended, including high school. Click [here](#) to pre-opt in to Tennessee Reverse Transfer. You can change your mind at any time prior to the degree being awarded by contacting your respective institution.

The confidentiality of your academic history is protected by federal law and your information will not be used for any other purpose than to determine if you meet the requirements for an Associate's Degree. If you have not yet completed all of the requirements for the Associate's Degree, you will be reconsidered next semester as you continue to complete your Bachelor's Degree.

If you have already earned a degree, why not receive it?
