4a. Scope: Work to be accomplished

The scope of this project consist of adding streambank stabilization to the outlet of stormwater pipes by using rip rap (rock) to keep the sediment from eroding into the drainage ditch or stream. This project will help keep our streams clean and free of sediment and pollution runoff.

4b. Scope: Benefit Statement

The benefit of adding this stabilization to the outlets of the stormwater pipes is so that less sediment and pollutants run off into our local streams and environment. We not only protect our local streams but the campus infrastructure will function better. Hydrocarbons (oil-based products that come off of vehicles) adhere to the rock and don't run off into the stream.
