## MTSU Clean Energy Initiative Project Funding Request

There are five (5) sections of the request to complete before submitting. See <http://www.mtsu.edu/sga/cleanenergy.shtml> for funding guidelines. Save completed form and email to [cee@mtsu.edu](mailto:cee@mtsu.edu) or mail to MTSU Box 57.

1. General Information	
Name of Person Submitting Request Brian Holley	
Department/Office Information Technology Division	Phone # (Office) (615) 898-2228
MTSU Box # CAB 217	Phone # (Cell)
E-mail <a href="mailto:brian.holley@mtsu.edu">brian.holley@mtsu.edu</a>	Submittal Date 09/04/2015

2. Project Categories (Select One)	
Select the category that best describes the project.	
<input checked="" type="checkbox"/> Energy Conservation/Efficiency	<input type="checkbox"/> Sustainable Design
<input type="checkbox"/> Alternative Fuels	<input type="checkbox"/> Other
<input type="checkbox"/> Renewable Energy	

3. Project Information
<p>a. Please provide a brief descriptive title for the project.</p> <p>b. The project cost estimate is the expected cost of the project to be considered by the committee for approval, which may differ from the total project cost in the case of matching funding opportunities. <b>Any funding request is a 'not-to-exceed' amount. Any proposed expenditure above the requested amount will require a resubmission.</b></p> <p>c. List the source of project cost estimates.</p> <p>d. Provide a brief explanation in response to question regarding previous funding.</p>
3a. Project Title Hyper-V DMZ Server Virtualization
3b. Project Cost Estimate \$25,000
3c. Source of Estimate Quote from Dell, Inc.
3d. If previous funding from this source was awarded, explain how this request differs? This request differs from previous applications since it involves implementation of new servers for our DMZ network. As a follow up to our

spring 2014 Hyper-V server virtualization/consolidation application, we require separate physical servers for our public Web facing applications for security.

#### 4. Project Description

(Completed in as much detail as possible.)

- a. The scope of the work to be accomplished is a detailed description of project activities.
- b. The benefit statement describes the advantages of the project as relates to the selected project category.
- c. The location of the project includes the name of the building, department, and/or specific location of where the project will be conducted on campus.
- d. List any departments you anticipate to be involved. Were any departments consulted in preparation of this request? Who? A listing may be attached to this form when submitted.
- e. Provide specific information on anticipated student involvement or benefit.
- f. Provide information for anticipated future operating and/or maintenance requirements occurring as a result of the proposed project.
- g. Provide any additional comments or information that may be pertinent to approval of the project funding request.

##### 4a. Scope: Work to be accomplished

After the successful Hyper-V server implementation funded by our spring 2014 sustainable campus fee application, ITD wishes to expand our Hyper-V server footprint to public Web facing applications. Currently all Hyper-V servers service internal applications, and we require separate physical servers for public Web facing applications operating in our DMZ network for security purposes.

As a result, ITD wishes to purchase two Dell PowerEdge R630 servers for these purposes to expand our ability to host virtual Web servers and reduce the number of physical Web servers. We will host one server in our Cope Administration Building data center and the 2<sup>nd</sup> server in Telecommunications Building data center.

**4b. Scope: Benefit Statement**

We estimate the project will reduce the electrical and cooling costs for each physical system by approximately 90%, down from approximately \$4,300/year to \$475/year.

**4. Project Description (continued)****4c. Location of Project (Building, etc.)**

Data centers in the Cope Administration Building and Telecommunications Building

**4d. Participants and Roles**

Systems Administration, Information Technology Division – implementation and management

**4e. Student participation and/or student benefit**

This project directly lowers the operating cost of the University thereby providing an opportunity for the University to reduce the utility costs passed on to students.

4f. Future Operating and/or Maintenance Requirements

The equipment has an estimated useful life time of five (5) years. Maintenance costs are included as part of the purchase expense.

4g. Additional Comments or Information Pertinent to the Proposed Project

This application relates to a larger multi-year project to reduce the operating costs within the University's data centers. ITD estimates that it will be able to reduce power and cooling demands by at least 50% by the end of the project.

If the University has additional clean energy funds available, ITD asks that consideration be given for the purchase of additional servers to allow for additional operating savings.

**5. Project Performance Information**

Provide information if applicable.

- a. Provide information on estimated annual energy savings stated in units such as kW, kWh, Btu, gallons, etc.
- b. Provide information on estimated annual energy cost savings in monetary terms.
- c. Provide information on any annual operating or other cost savings in monetary terms. Be specific.
- d. Provide information about any matching or supplementary funding opportunities that are available. Identify all sources and explain.

5a. Estimated Annual Energy Savings (Estimated in kW, kWh, Btu, etc.)

Power: ~43,000kWh annually  
Cooling: ~19,000Btu/hr

5b. Annual Energy COST Savings (\$)

Power: ~\$3,000  
Cooling: ~\$800

5c. Annual Operating or Other Cost Savings. Specify. (\$)

Total: ~\$3,800

**5d. Matching or Supplementary Funding (Identify and Explain)**

The total cost of the entire multi-year server consolidation and virtualization project is approximately several hundred thousand dollars. ITD has proposed allocating equipment and other funds to complete the project.
