Preview the event information and, once you've entered all the event information, click the **Save** button to save the event request.

Your event request will be saved. You will be shown the Event Detail screen, which looks something like this, with some notifications to the bottom left of your screen letting you know of the success of the saved request:

You will receive an email telling you that your request was received, and shortly thereafter, a scheduler will contact you to confirm the reservation. Event advertising should not take place until you receive confirmation from a scheduler.
