MTSU is transitioning its WiFi infrastructure to a new vendor. This change will bring improved connectivity and new features. While you’ve been accustomed to connecting to WLANMTSU, this new WiFi network is “BLUEWIFI”. This guide will help you in connecting to BLUEWIFI:

1. Be sure you’re connected to the BLUEWIFI WiFi network.

2. Using your chosen web browser (Edge, Chrome, Firefox), attempt to go to a website. You should get caught by the BLUEWIFI portal.

3. Enter your username (without the @mtsu portion) and password, then select Sign On.
4. You will be welcomed to the campus network. Click **Continue**.

5. The next screen will inform you that you have Internet access.
