

MTSU School of Nursing Peer-Tutoring Program

The MTSU School of Nursing now offers a peer-tutoring program that we believe will further aid in your academic growth and help ensure success in the Bachelor of Science program within the School of Nursing. This program will be comprised of fellow nursing students who have voluntarily agreed to offer their tutoring services at no charge to their peers. These students have all successfully passed the course/competencies for which they will be tutoring, and have the full endorsement of the professors teaching these courses.

If you are interested in obtaining a peer tutor, **please click on the email address** for the corresponding faculty member in charge of overseeing the tutoring for the respective course. The faculty member will send you a list of available tutors that you can contact to begin the tutoring process, along with guidelines and a contract to sign and return.

If you have any further questions about the program please contact me at the email below.

Sincerely,

Dr. Garrett Salmon

Assistant Professor-School of Nursing

Email: Garrett.Salmon@mtsu.edu

Peer tutors will be available in the following courses; **Pathophysiology, Pharmacology, Health Assessment, Basic Dosage Calculation and Adult Health I/II.**

Pharmacology & Pathophysiology Email: Stacey.Browning@mtsu.edu

Health Assessment & Basic Dosage Email: Lisa.Cejka@mtsu.edu

Adult Health I/II Email: Cherese.Brooks@mtsu.edu
