To Add a Link to Your NavBar:

1. Go to Edit This Navbar by moving your mouse to the far right of the navbar and select the 3 dots

2. On the screen that opens, select add links.

3. When the Add Links box appears, scroll down to the Tutor Me option and check the adjacent box.
4. Click on Add

5. It should now be added to the end of your Navbar. To move it within the Navbar, drag and drop it to your desired location, just as you drag and drop in content.

That should be it!
