

# Embedding Panopto Videos Using Embed Code

1. From your D2L course shell, click the **Videos** tab to open Panopto in a new tab/window.
2. You will land in the Panopto folder associated with the course

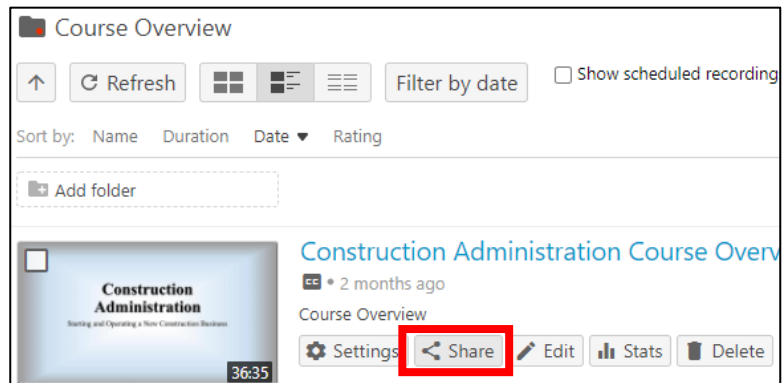

3. Navigate to the video you want to embed.

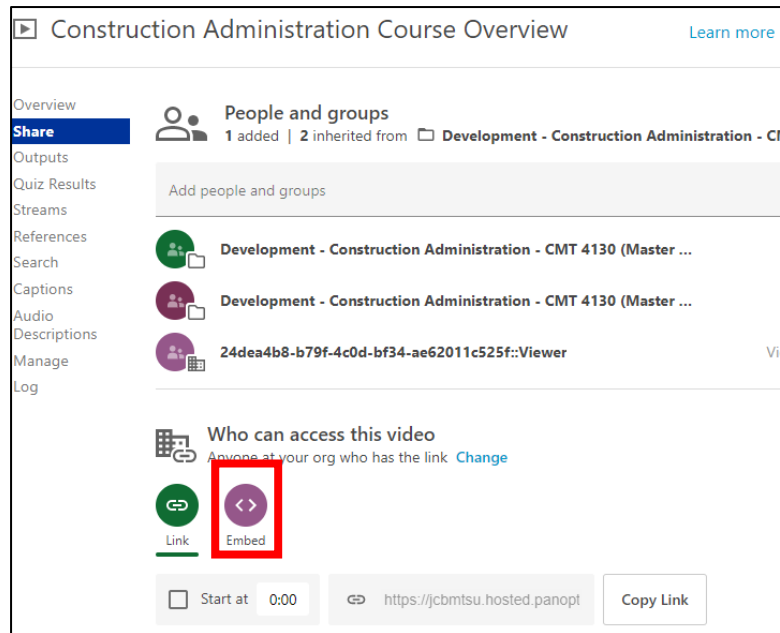

4. Hover over the title of the video. Buttons will appear beneath the video description.

5. Click the **Share** button.

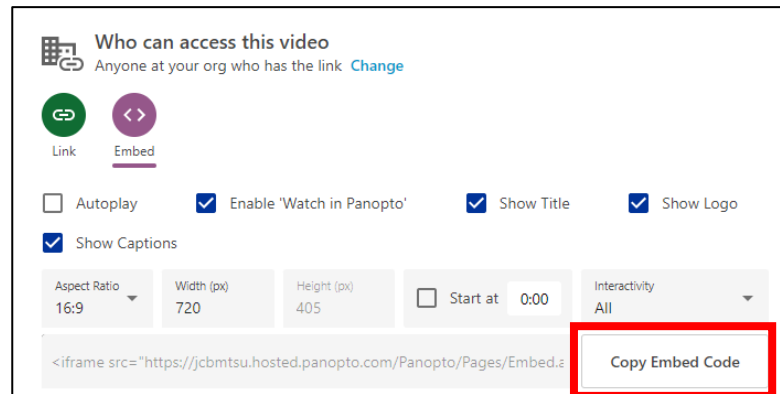

# Embedding Panopto Videos Using Embed Code

- In the pop-up window that appears, click the **Embed** button under the *Who Can Access This Video* section

- New information appears below the Embed button. In the lower right corner, click the **Copy Embed Code** button.

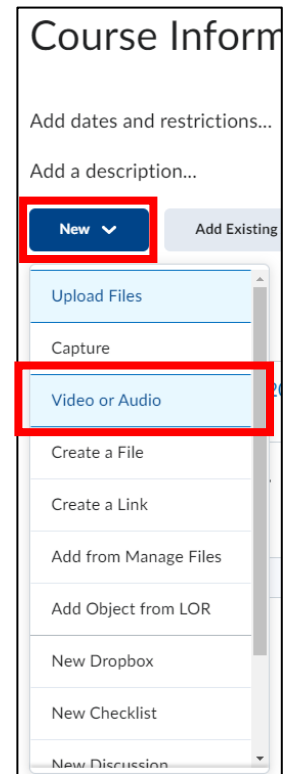

- Go to your D2L course shell (click on the other tab or window open in your browser).

# Embedding Panopto Videos Using Embed Code

9. Go to Content and navigate to the module in which you want to embed the video.

10. Click the **New** drop-down button.

11. Select **Video or Audio**.

12. *Paste* the embed code copied from Panopto into the larger box at the top of the pop-up window

13. **Enter a title** for your video and click the **Save** button to complete the process.

14. The video entry will appear at the end of the content listings.
