Geriatric Update Conference

Aiming for Person-Centered Care

Sponsored by: The Middle Tennessee Geriatric Workforce Enhancement Program:
A consortium of community and educational organizers

Theme: Person Centered Care

The COVID-19 pandemic has revealed the critical importance of social connections, outreach and the need to engage, empower, and educate caregivers as well as the direct care workforce to promote resilience and recovery. The proposed curriculum will address COVID-19 response and recovery, behavioral health support, community health collaboration, provider resilience, and telehealth implementation through a lens of health equity and diversity, leveraging existing partnerships and trusted messengers.

Conference Goals:

This interdisciplinary conference is designed to provide evidence-based information on promoting resilience and recovery for healthcare workers and caregivers to optimize care of older adults.

Conference Objectives:

1) Participants will understand the importance of social connections for older adults
2) Participants will become familiar with new models to enhance person – centered care
3) Participants will become familiar with ways to foster resilience among caregivers
