

A RESOLUTION TO: Have sidewalks and drainage system improved to prevent rainwater from flooding the sidewalks to improve travel for individuals with disabilities.

Whereas: The Middle Tennessee State University campus usually floods when it rains causing sidewalks to become covered with water

Whereas: Middle Tennessee State University has a large number of visually impaired students who may not be able to judge the depth of the water, nor be able to find a way around it, which is a nuisance and may be dangerous for them.

Whereas: Middle Tennessee State University has a number of students who rely on electric wheelchairs to assist them in getting to class. The standing water may damage these wheelchairs.

THEREFORE, LET IT BE RESOLVED BY THE 65TH SGA CONGRESS THAT:

Section 1: Upon passage, Middle Tennessee State University must review this situation for options to find ways to prevent or significantly decrease the amount of water that collects on the sidewalks when it rains (i.e. improve the drainage, etc), student welfare requiring it.
