

**Middle Tennessee State University
Flight Training Cost Summary 2024-2025**

Note: The required hours of flight and ground instruction for each flight course, along with the course cost based on those hours, is indicated below. Based on historical data, some students require more than the required hours of training to be proficient and able to pass their FAA check ride for a particular course. *Students are required to deposit the minimum amount indicated on the last (italicized) line of each course into their flight account prior to beginning training and before the funding deadline. The required amount includes 4.5 hours of ground and 4.5 hours of flight for review and checkride for Part 141 labs and 2.0 hours of ground and 2.0 hours of flight for review and checkride for Part 61 labs (excluding AERO 3202, 3212, 3205, and 3206). These rates are effective 1/21/2025.

Students using VA benefits for flight training costs do not have to make this deposit, but are only eligible for reimbursement of the required hours indicated below flown towards a required syllabus lesson. Any hours incurred above these hours will be the financial responsibility of the student.
